

Plugs - VK Grout Plugs

VK Grout Plugs

VK Grout Plugs are constructed of zinc and rubber with mild steel pipe in the centre. This allows the grout plug to be drilled out. The VK grout plug can be adapted to drill rods by a left hand pipe thread which allows them to be removed after cementing. **Custom sizes available.**

VK Grout Plug Type 'A'

Type 'A' includes a built-in check valve which seals pressure in the hole making it ideal for grouting.

Components:

- Left or right hand pipe thread
- Wedges
- Rubber seal
- Aluminum tube
- Plastic check ball
