## ROBIT IN BRIEF

### The Experts in Drilling Tools

Robit is a global expert focusing on high-quality drilling tools for mining and construction markets to help you drill further and faster. Robit strives to be world number one company in drilling tools.

Through our high and proven quality Top Hammer, Down the Hole and Geotechnical products, combined with our expert services, we deliver concrete savings in drilling costs to our customers.

Robit has its own sales and service points in six countries and an active distributor network with a global footprint selling to more than 100 countries. Robit's manufacturing units are located in Finland, South Korea, and the United Kingdom.

Robit is listed in Nasdaq Helsinki Ltd's marketplace with trading code ROBIT.

For more information, visit [robitgroup.com](http://robitgroup.com)

## PRODUCT LINES

### Top Hammer Business

Robit Top Hammer business line covers all applications in construction, quarrying and mining, as well as blasting and forepoling, from the softest to the hardest of rock conditions. Underground construction is one of the most important customer segments for Robit bits, and applications such as drifting and bolt hole drilling are well catered for, as well as RoX top hammer casing systems for tunneling support. Robit's quality has been approved worldwide by major mining and quarrying customers. The selection is wide and encompasses products, such as: drifting and tunneling bits, reaming equipment, bench and production drilling bits, rods, shanks, couplings, and auxiliary tools, such as button bit adapters.

#### We offer You:

- *The highest quality in drilling tools – our focus is 110% in drilling tools*
- *Proven excellence in drilling performance – backed by numerous references*
- *We emphasize short lead time and precise deliveries from our 3 factories, supported by comprehensive local availability on every continent.*

*Robit is following together with its key customers the development steps of more powerful hydraulic drifters. Robit is modelling and simulating the dynamic forces and stresses, and innovates new solutions to meet the drillers' needs for the best performance, efficiency and lifetime.*

### Down the Hole Business

The Down the Hole business line covers all operations related to the down the hole drilling method. The main product categories consist of DTH hammers, DTH bits and DTH tubes. The selection is competitive and encompasses top quality products for all your drill & blast as well as well-drilling applications.

### Geotechnical Business

Robit's Geotechnical business line focuses on geotechnical applications, particularly anchoring, micropiling and underpinning, piling, and well drilling. Geotechnical applications are most commonly related to drilling done before or as a part of a construction process. Our selection contains a wide variety of specialized hammers, drill bits and ring bits, as well as advanced casing systems for all your needs.

More info about Robit's products and digital catalogues at company's website: [www.robitgroup.com](http://www.robitgroup.com).

## TOP HAMMER APPLICATIONS

**Robit**  
TOP HAMMER

**Robit**

## Competitive offering in Top Hammer drilling consumables

- **Efficient Button Bits** – top of the class rate of penetration providing lowest cost per meter.  
Developed in co-operation with customer's field tests.

- **Reliable Reaming Equipment** – wide range of modern Rbit™ Dome Reamers.

- **Strong Drill Steel** – Rods, Top Hammer Drill Tubes, Shanks and Couplings. Manufactured in one of the world's most modern factories in South Korea with the latest technology. Shanks for all common drifter brands. Wide range of rod types and lengths.

## Proven quality – manufactured with automated production lines

- Sustainable, 100% recyclable steel and over half of it is carbon neutral
- Excellent and optimized bits for abrasive and soft rock formations
- High penetration rate in all rock formations

## Reliable partner

*Competitive offering in drilling consumables – Proven quality – Customization for project needs  
– Drill master service – Solving drilling challenges and problems – Experience – References*

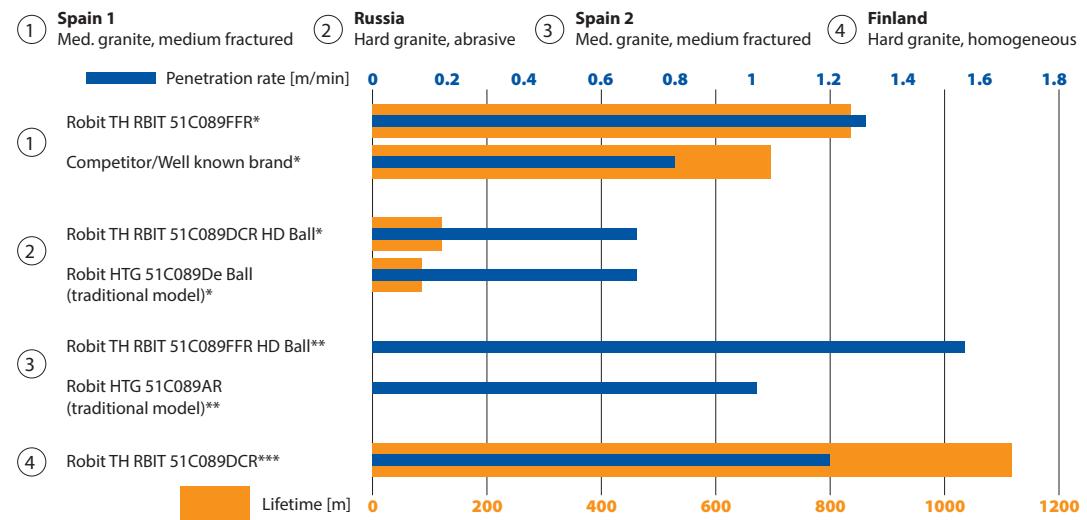

## New Robit Superior Rbit™ Button Bit Series – Functional Design for Professionals

Our customers already know the great quality of our Top Hammer Button Bits. However, we took up the challenge of making our bits even better. All our button bits have been manufactured with recyclable 100% steel. Consistent top quality is guaranteed by fully automated production lines. Rbit™ are finalized with water-based paint. As a result, we have created the Rbit™.

With the Rbit™, our commitment is to help our customers to reduce the total drilling costs by **achieving faster rate of penetration and the lowest cost-per-meter**. The Rbit™ features:

- An optimized button layout configuration of the Flat Face, to ensure **maximized rock contact and energy transmission**.
- A new transition face was developed in both Flat Face and Drop Center to **improve the transfer of percussion energy into the rock**.
- Enhanced flushing design, now available in our Flat Face and Drop Center models, delivering even **faster rate of penetration**.
- Redesigned wider retrac grooves allow more space, delivering a **better flow for the cuttings**.
- **Heavy Duty models** are now **available** in both Flat Face and Drop Center.

*All of our new high-quality Rbit™ drill bits have been designed with state of the art Computer Fluid Dynamics (CFD) simulation. Moreover, field tests globally have demonstrated clear evidence of a superior drilling performance, which our technical simulation had already guaranteed (refer chart on the right). Our partner drillers were happy with the excellent performance and noted better flushing and longer grinding intervals with the new Rbit™ drill bits. Robit products are developed in the challenging rock conditions of Scandinavia and have a proven record globally. With Robit's new Rbit™, we have found yet another way to deliver excellence to our customers worldwide.*

*Summarizing all the essential drilling features, we are going deeper with more speed and force, driving the development of the drilling consumables industry. As an established global company, we continuously need to reinvent ourselves. Across the globe, our cases are more versatile, our knowledge base wider, our questions and tools for finding answers smarter. We fight hard every day to be the strongest and smartest when it comes to the space between drill and rock so that we deliver only the best to our valued customers. That is the true spirit of Robit® Rbit™.*

# ROBIT® RBIT™ MANUFACTURING

## Premium Steel

More than 50% of the steel used in Rbit™ button bits are manufactured from carbon neutral steel.

1

4

## Buttoning

Robit buttoning cells are the latest state-of-the-art robotized units – optimized insertion secured.

## Automated Production Lines

Fully automated production lines with the latest technology guarantee consistent top quality.

2

5

3

6

## Automated Painting Line

Robit Rbit™ button bits are painted with water-based paint.

## Quality Inspection

Each Rbit™ button bit will be inspected during the manufacturing process.

## Scheduled Delivery

All of the Robit products will be delivered for the customers precisely.

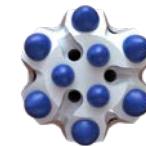

### New transition face ensuring better energy transfer

- Transition face with rounded edges enables better flushing design and optimized button layout ⇒ New functionality of the bit

### Optimized button layout maximizing rock contact

- Smart button configuration ⇒ Optimized rock breaking dynamics

### Wider flushing grooves allowing better flow of cuttings

- Improved flushing ⇒ Maximized flushing efficiency

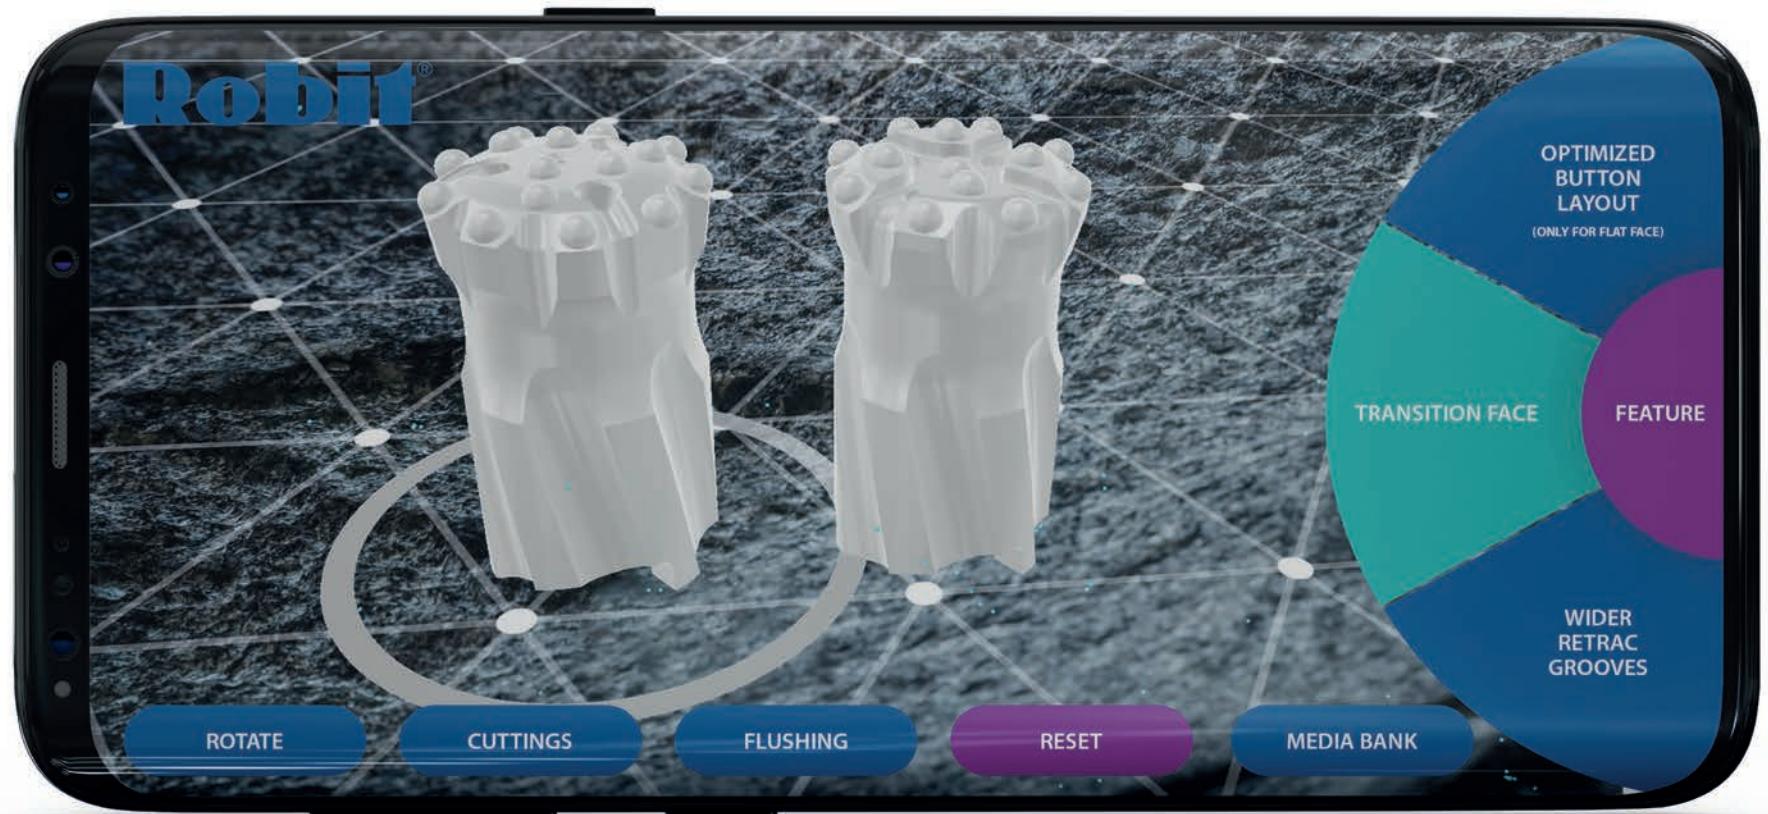

### Optimized placement of flushing holes allowing better flow of cuttings

- Improved flushing ⇒ Maximized flushing efficiency

## ROBIT® RBIT™ AUGMENTED REALITY "AR" APPLICATION

### Robit® Rbit™ AR Application

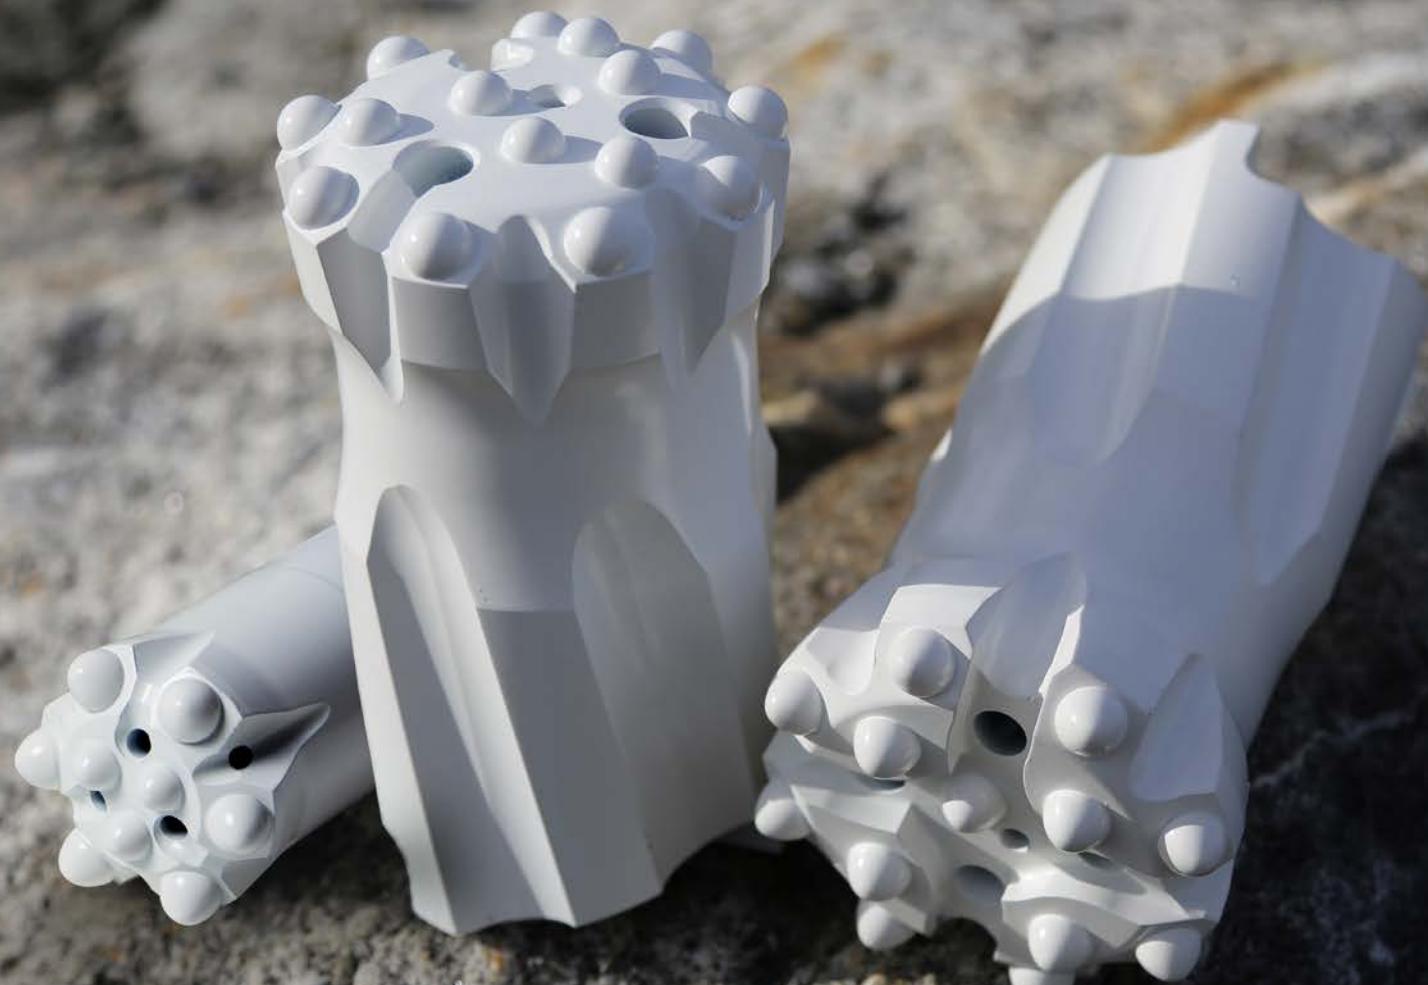

Please download Robit® Rbit™ AR Application for your smartphone to present the new series for your customer. You can demonstrate new features without carrying bits in your pockets. Applications will be found with "Robit Rbit" title:

iOS

Android

# ROBIT® RBIT™ DESCRIPTIONS

## Robit Premium steel

All of the Robit button bits are manufactured of 100% recyclable steel. Over half of the steel used in Robit button bits is carbon neutral. Robit steel grade gives even more uniform properties and improved fatigue strength, which is crucial in rock drilling process.

- Specially designed for Robit
- Better fatigue and wear resistance
- 100% recyclable
- Over 50% of steel used is carbon neutral

## Robit Rbit™ button bit description

### **Best Sellers\*** (high availability)

All of our button bits are designed and manufactured with the highest standards of quality. Now you can also easily find the preferred button bits from drillers worldwide. You can find those throughout the catalogue as the part number is highlighted in blue with a star.

## Robust buttons

All the products are available with semi-ballistic or hemispherical buttons.

Semi-Ballistic button

Hemispherical button

## Optimized body types

Standard body

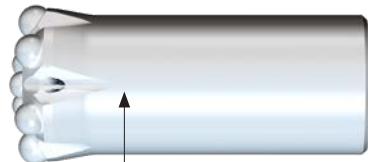

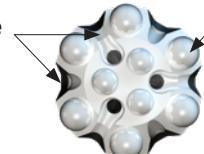

Retrac body

## ROBIT® RBIT™ FEATURES

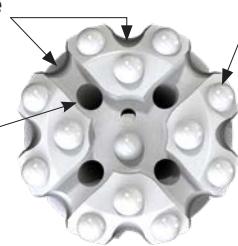

### Rbit™ series specifications

Flushing grooves in face and on side      High quality tungsten carbides

Wear resistant heat treated steel body made from high quality Scandinavian steel

Flushing grooves in face and on side      High quality tungsten carbides

Improved face flushing hole

New optimal retrac body

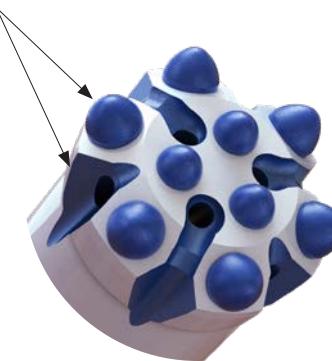

Wider retrac grooves

R - Retrac teeth

Wear resistant heat treated steel body made from high quality Scandinavian steel

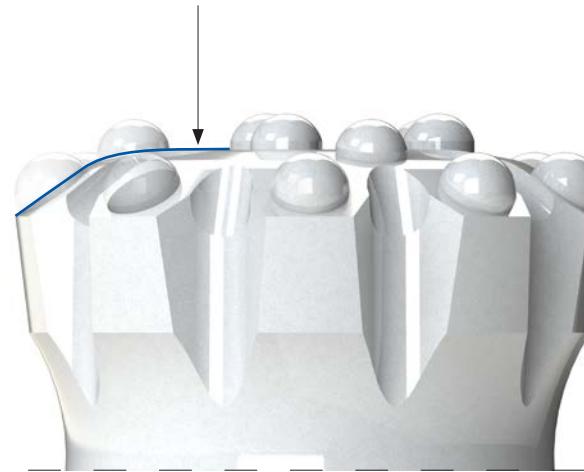

### Rbit™ S-model radical updates

Optimized flushing grooves & holes and button layout

### Revolutionary transition face (FF & DC models)

Transition face with rounded edges enables optimized button layout and new functional features to the bit.

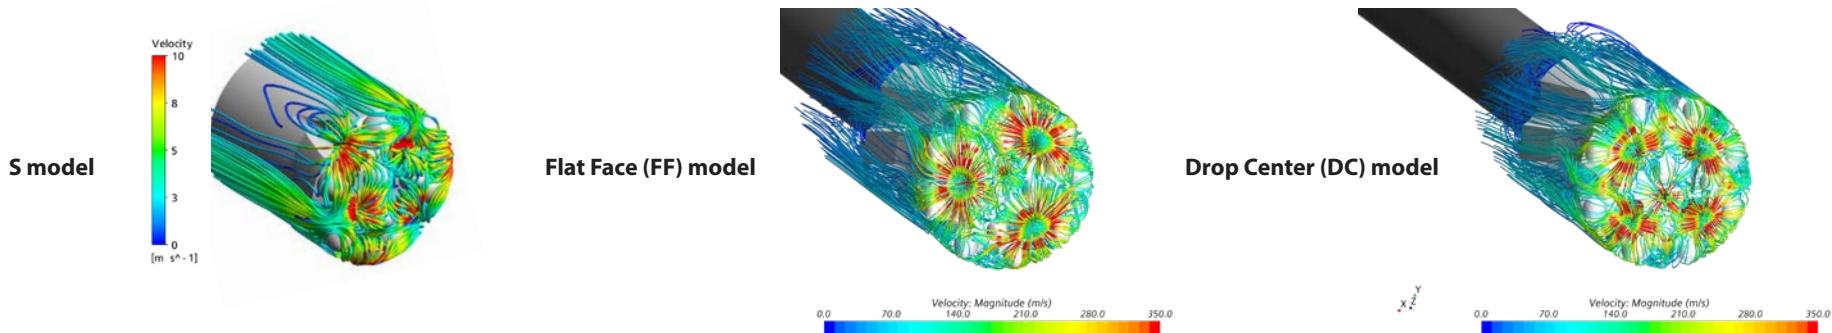

# ROBIT® RBIT™ BIT SELECTION GUIDE

## Rbit™ series specifications

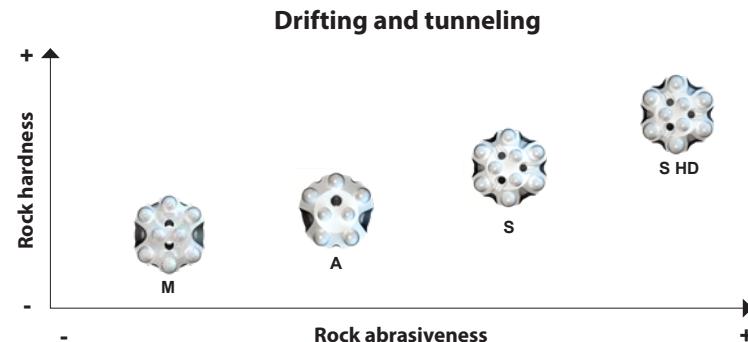

Computational Fluid Dynamics (CFD) simulation images show the efficient flushing properties of new Rbit™ series.

## Advanced face types

- A = Basic model for medium and hard rock drilling  
M = Maximized flushing properties for soft and medium hard rock  
S = Speed drilling model for various conditions  
S HD = Speed drilling Heavy Duty model for various conditions

- FF = Flat Face for medium and hard rock conditions  
FF HD = Flat Face Heavy Duty model for more abrasive conditions  
DC = Drop Center model for straighter holes with maximum flushing properties. (For soft and medium hard rock for speed drilling)  
DC HD = Drop Center Heavy Duty model for more abrasive conditions

### Drifting and tunneling

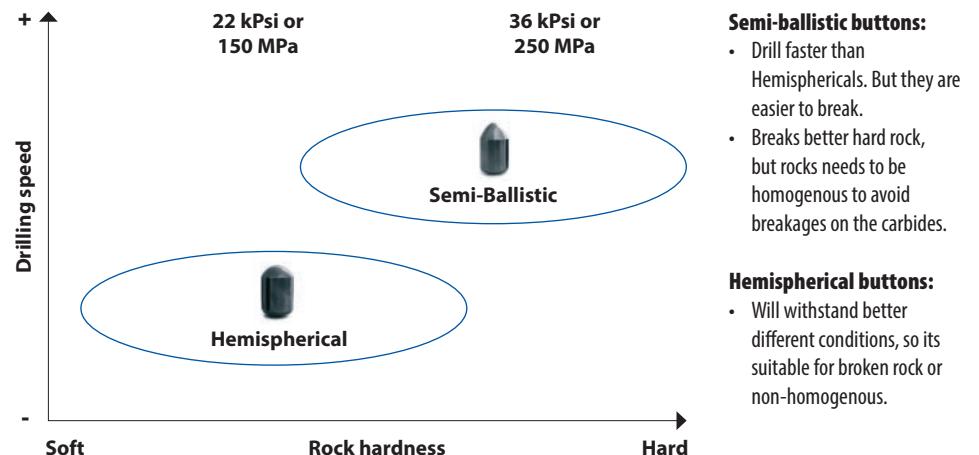

### Surface and long hole drilling

## Selecting body type

## Selecting carbide shape: drilling speed versus rock hardness

# ROBIT® ROD & SHANK MANUFACTURING

## Automated Rod Production Line

Fully automated rod production lines with latest technology guarantee consistent top quality.

1

4

## Automated Shank Production Line

Fully automated and robotized shank production lines with 5 axis CNC machines providing top quality products.

## Automated Friction Welding Line

The latest friction welding machine with robot handling systems installed for rod production

2

5

## Rod Straightening

Automatic straightening machine guarantees the best quality product supply to the customers.

3

6

## Scheduled Delivery

All of the Robit products will be delivered for the customers precisely.

### Thread type

### Material profile

## Robit® Drill Rods

- Manufactured from premium-grade hollow drill steels, Robit® drill rods offer exceptional strength and extended thread life.
- The rigid drill steel enhances hole straightness.
- Automated production guarantees the consistent, top-tier quality of Robit® drill rods.
- Comprehensive offering of Drifter rods, Extension rods, Drill tubes, and Guide tubes to meet all your drilling needs.
- Available in various thread types and standard lengths.

**Robit**

## Robit® Shank Adapters

- Robit® Shank Adapters are manufactured using specially developed alloys and heat treatment to achieve an optimal balance of core strength and case hardness, ensuring extended wear and fatigue life for maximum productivity.
- Available for most brands of rock drills in the market.

LONG HOLE DRILLING

# LONG HOLE DRILLING

## Production drilling

S, S HD

All-Round Model

Flat Face for medium and hard rock conditions

FF HD, FFR HD

Flat Face Heavy Duty model for more abrasive conditions

DC, DCR

Drop Center model for straighter holes with maximum flushing properties. (For soft and medium hard rock)

DC HD, DCR HD

Drop Center Heavy Duty model for more abrasive conditions

Long Hole Drilling

Please note: Face designs might vary depending on bit diameter.

## SURFACE DRILLING

## SURFACE DRILLING

Flat Face for medium  
and hard rock  
conditions

FF, FFR

Flat Face Heavy Duty  
model for more  
abrasive conditions

FF HD, FFR HD

Drop Center model for  
straighter holes with  
maximum flushing  
properties. (For soft and  
medium hard rock)

DC, DCR

Drop Center Heavy Duty  
model for more abrasive  
conditions

DC HD, DCR HD

Please note: Face designs might vary depending on bit diameter.
